

Electrical projection screens

The right electrical projection screen for every application

The Elpro electrol was specifically developed for professional users. It is available in a wide choice of sizes, formats and screen fabric types, guaranteeing that it is ideally suited for every customer's specific applications and requirements. In addition, the heavy screen fabric ensures that the projection surface is kept absolutely flat to guarantee the best image quality. It should come as no surprise that the Elpro electrol is Projecta's best-selling electrical projection screen.

Professional electrical projection screen.

Compliant with international safety standards.

Low-noise motor with 5 years guarantee and NF and VDE quality mark.

Features an extra fast motor for screens of 240 cm and wider.

Wide selection of seamless screen fabrics at various quality levels.

Modern design and colours.

Easy to mount on wall or ceiling.

Accessories:

- ▶ Ceiling brackets
- ▶ OHP extension arms
- ▶ Wall clamps
- ▶ Radio remote control
- ▶ Key switch

See page 34/35 for further details.

Elpro electrol

▶ **High-quality projection screen fabric.**

The Elpro electrol is available with a wide range of screen fabrics. All types of screen fabric are seamless, made of glass fibre and fitted with black borders. The following types and grades of screen fabric are available:

Screen fabrics / Quality	Strong	Extra heavy
 <p>Diffusion</p>	<p>For clear, true-to-life colours in a large viewing angle.</p> <p>Matte white S 462 gr/m² black rear side</p>	<p>Matte white M 780 gr/m²</p>
 <p>Reflective</p>	<p>The perfect combination of increased reflection and better than average viewing angle. Ideal for video and data projection.</p> <p>Datalux S 465 gr/m² black rear side</p>	<p>Datalux M 850 gr/m²</p>
 <p>Retro-reflective</p>	<p>Screen fabric with the highest possible reflection value. Ideal for projection in environments with a high degree of ambient light.</p> <p>High Power 680 gr/m² black rear side</p>	

▶ **Attractive combination of ease of assembly and design.**

Thanks to the universal mounting brackets on the sides of the case the Elpro electrol is easy to mount on the wall or the ceiling. The brackets and screws are concealed by light-grey, plastic covers.

A striking feature is the triangular lower beam which shuts off the case when the screen has been rolled in. This makes the Elpro electrol also ideally suited for integration into a lowered ceiling. The motor is easy to adjust through the two openings at the bottom of the case.

Screen size in cm	Viewing size in cm	Nominal diagonal	Screen fabrics
