

Portable projection screens

PROJECTA

For professional on-site presentations

As LCD projectors become increasingly compact, on-site presentations are growing more and more popular. To come perfectly prepared, many presenters like to bring their own projection screens. Just like the LiteScreen and TableScreen, the new PortaLite has been especially designed for frequent, portable use. A compact, ultra-light projection screen in a modern design, which can be set up in a matter of seconds. Your perfect partner for professional presentations on location.

NEW

PortaLite

Ultra-light, aluminium case with handle.

Set up, pull out and ready to use.

Available in 3 video formats (50", 60" and 72") and 2 screen fabrics (Matte white S and Datalux S).

Projection screen fabric with black borders all around for increased perceived clarity.

Case protects screen fabric from damage and dust during transport.

Ingenious tensioning arm with pneumatic springs provides for flexible height-adjustment and a taut screen fabric.

Four legs built into case can be folded in and out (with the exception of 50" table model).

PROJECTA

LiteScreen

- ▶ Light, black aluminium case.
- ▶ Datalux F screen fabric for perfect display of data and video.
- ▶ Extremely stable thanks to two fold-away feet.
- ▶ Flexible viewing-height adjustment with black drop to underside of case.
- ▶ Wide, black borders all around for increased perceived clarity.
- ▶ Also available in 100" diagonal.

NEW

PortaLite

- ▶ Ultra-light, aluminium case in modern design.
- ▶ Four legs built into case provide for a stable construction when folded out.
- ▶ Table model 50", without legs, for placing on tables.
- ▶ Available in Matte white S and in Datalux S screen fabric.
- ▶ Excellent price/quality ratio.

TableScreen

- ▶ Table model (40" / 50") for presentations in small groups.
- ▶ Most compact and light projection screen.
- ▶ Tensioning arm guarantees easy roll and re-roll of screen fabric.
- ▶ 4 fold-away feet provide stability.
